

Alien Technology Advances

Today, at 10:45am, a disatorous event occurred. The Field Opposite our Main Headquarters, got cut with advance, modern technology. These large metallic boxes, with long cylynders at the front glided into the field. Within 30 minutes the corn was gone. It lay on the ground for a few hours before being squashed into large big boxes. We do not know what these boxes were for, and what they will do with them. But we need to know fast. This field has been unfortunately destroyed by alien-like contraptions, and we need to know what they could be doing next. A picture below shows how devastated and destroyed a good healthy field of wheat got transformed into by these strange devices.
